

First Data™ Restaurant Solution

The First Data™ Restaurant Solution is an all-in-one point-of-sale (POS) computer system designed to help small to mid-size restaurant owners improve productivity and increase profitability.

The Challenge

Restaurant owners need to make sure their customers are served quickly and efficiently, while also managing their restaurant's finances, sales, special menu offerings and personnel.

To handle all of these responsibilities, many restaurant owners use a mixture of separate devices from several different vendors or avoid technology altogether and use time-consuming paper guest checks and antiquated cash registers.

The Solution

The First Data Restaurant Solution is a comprehensive, cost-effective system that provides everything necessary to manage all aspects of a restaurant business.

This hard-working system, created by restaurant owners for restaurant owners, combines convenience and ease of use, which allows more time spent focusing on customers and less time in the back office.

Here's How It Works

The First Data Restaurant Solution includes a high-performance integrated computer powered by an Intel® processor, a software package featuring Microsoft® technology, and First Data payment processing that accepts many payment types, including Visa®, MasterCard®, Diners Club®, Discover® Network, American Express® and JCB cards, as well as gift cards.

With features that provide customer-specific pricing and special discount options, easy tracking of fresh sheet menu items, and faster, more accurate transactions, the First Data Restaurant Solution can be an invaluable business tool.

First Data™ Restaurant Solution

Industries Served

- Small to mid-sized restaurants

Help Your Business

- Turn tables faster by speeding up guest check processing
- Boost menu item sales by promoting specials at the table
- Improve security and prevent loss
