Subject: Next Steps

And John? Words fail me. What a pleasure to work with! He seems to be genuinely excited about our house and his advice has always been ethical and sound. I couldn't ask for better communication from anyone... every time there was anything of interest, John called to let us know what was happening. He really understands the impact that a major event like this has on people and how important it is to keep them in the loop! After only talking to him once he knew better what we were looking for in a house than "you-know-who" ... plus he dropped everything to show three really great houses to me each better than anything she had shown me when we were considering the house. He is a treasure... knowledgeable, ethical, hard-working, energetic, enthusiastic.... why, he give Realtors a good name!!

I just wanted to pass that along because people usually only say something when it is negative... But both of you and your staff has been just exemplary.

Thank you for everything, I look forward to the next steps!

Bonnie
