

The Life Blood of Any Small Business – CASH!

By all accounts, small businesses are accounting for most new job creation; there are more businesses than ever serving more needs than ever to a greater number of people than ever before! The internet is even opening up national and even international opportunities to even the smallest of businesses. It is exciting times!

But one thing still remains the same...even successful businesses typically are tight on cash. Oh, they can make enough every month to cover the bills but precious little is left over for most small businesses. So cash is king. Having cash allows you to weather storms; allows you to open up new opportunities and is critical to a healthy organism. And even if you don't have a need for extra cash right now, it is much easier to get lines of credit when you don't need them....

And we have the products to help your small business grow. Because we have direct connections to life insurance conduits, Wall Street and Government backed funds...we have the products that a small business needs....

Unsecured Lines of Credit: These are available with income verification OR without and from \$25,000 all the way up to \$250,000! These are interest only, you only pay on what you use and can sure be handy in a pinch. When our West Palm office in Florida got destroyed by a hurricane and our lovely landlord refused to fix it and insurance refused to cover it...a line of credit saved the day for us...

Credit Card Advance: If you have a business that does consistent credit card sales, this loan may be the ticket. We can usually advance you the amount of your average monthly credit card sales. So say you own a deli and do \$50,000 a month in credit card sales, we can loan you \$50,000 with no upfront fees, no credit checks, no questions asked! Ideal for those tight situations...

Factoring Loans: We can also do loans for you based on receivables you may have. Say you own a tomato farm and a large supermarket chain buys \$30,000 worth of tomatoes from you a month. We can loan you based on the supermarkets creditworthiness and take repayment from the future invoices...

And so much more. Whatever your need, if you are a small business, we may be able to help. So give us a call at **317-577-1962 (800-430-9222)**. Small business runs America and we help support small business!
